«Project Technician»

Contact information

Contact name	Yorkshire Water
Contact phone	01274 692653
Location	England, North West, Manchester, Bradford

Job details

Salary	up to £250 per Year
Job type	Permanent
Benefits:	Salary Up to £25,000.00 per annum dependent on experience + attractive pension + quarterly performance related bonus + 25 days annual leave

Requirements

The successful candidate will be commercially aware, a confident and pro-active individual, you will be able to make effective decisions and consider the consequences of your decision making. Previous experience of co-ordinating small projects and preparing proposals is desirable but not essential, as full training will be provided. This is an exciting new role in the business which provides you with the opportunity to develop some key skills as you provide project support on more complex and challenging projects.

You will be working with customers and the Three Sixty supply chain representing the face of Three Sixty, therefore it is vital that you have good communication and interpersonal skills.

We manage the delivery of commercial solutions to our customers water and waste water related issues and an appreciation of how to best resolve these through commercial arrangements would be advantageous. The role will also involve understanding leakage and metering related issues, therefore you will need to be able to understand and analyse technical information. You will also play a key role in constructively challenging areas of the business and business processes to ensure that health and safety is at the heart of efficient project delivery.

From time to time you may be required to visit customer sites, therefore a full valid EU driving licence is required.

Job responsibilities

Joining a rapidly expanding team, working in a commercial environment you will provide water and waste water services to commercial and industrial customers throughout the UK.

You will be responsible for the co-ordination of a range of small private commercial customer projects using in house and supply chain resources and occasionally supporting project managers on larger schemes.
