Job details

Salary £20627 - £25784 per Year
Job type Contract
Benefits: Salary & Benefits £20,627 - £25,784 per annum dependent on experience + pension + quarterly performance related bonus + 25 days annual leave + Company Van + training & development opportunities in line with the Distribution Maintenance Technician progression plan

Requirements

You will ideally have previous network experience and have an ability to use and understand Network Schematics and if applicable promote updates. You will be familiar in the safe operations of network valves with due regard to Health and Safety, customer supply and water quality. You will have the ability to work independently but primarily you will be working as part of a team of two . Previous experience of Odyssey and Microsoft Excel would be advantageous. You will also hold a current accreditation in RASWA and be IT literate. You will also hold a full valid EU driving licence.

The successful candidate will be an effective team-player with a can do attitude and be willing to work flexibly in order to cleanse problematic zones.

Job responsibilities

You will carry out investigations of the water network using a variety of techniques such as flushing logging, surveying and sampling. You will also identify any network anomalies through following the planned flushing schedules. You will cleanse the water mains and capture data through the use of mobile technology. You will demonstrate excellent problem solving skills and the ability to adapt from a proactive to reactive scenario. The successful candidate will be an effective team-player with a can do attitude and be willing to work flexibly in order to cleanse the highlighted parts of the water network (DMA's) throughout the region.

You will be required to undertake night work, when it is needed to be able to complete the cleansing of more problematic zones.

You will be a mobile worker, working across the South Yorkshire region.
